

# Daily Mental Maths Tasks.

Use the number line you have made to help you with your Mental Maths starters. Choose three each day from the list below. There are also some Maths game ideas if you would like to use them.

- Count forward and back in 1s, 2s, 5s and 10s.
- Can you think of five odd numbers? Can you share odd numbers?
- Can you think of five even numbers? Can you share even numbers?
- What is double 1, 2, 3, 4, 5?  
If you can double these can you now double 6, 7, 8, 9, 10?
- Take some numbers off the washing line, hide them around the house. Can you find the place on the number line where the numbers should go?
- Take down the cards and pin up some socks. Can you pair them up and count in 2's?
- Can you begin counting from a different number and stop?  
Eg 7, 8, 9, 10, 11, 12, 13, 14, 15, 16, 17, 18.
- Can you say one more than a number to 10? Then try to 20.
- Can you say one less than a number to 10? Then try to 20.
- Can you say two more than a given number? Remember to use the number line to help you jump forward accurately.
- Can you say two less than a given number? Remember to use the number line to help you jump forward accurately.
- Can you write numbers to 20? Numbers 1-9 have one digit and numbers 10-99 have two digits and numbers 100-999 have 3 digits.

## Games to play at home.

- If you have a pack of playing cards can you get all the hearts out and order them from the lowest to the highest? The ace can be your zero.  
Shuffle the cards and see if you can order them again.
- Play snap with playing cards.
- If you have set of dominoes at home can you play that with a member of the family?
- Play a game with dice. Can you recognise the dots without having to count them?
